Dual Major

A candidate for an undergraduate degree from the College of Technology who desires to take a second major from the College of Technology may:

1. Take work in the second major after graduating from the university; *or*
2. Qualify for the dual major program by:
   - securing permission from the Dean of the College of Technology before the end of his/her junior year;
   - completing the requirements for both majors for the Bachelor of Science in Technology;
   - completing at least 3 cooperative education experiences (a minimum of 12 credit hours, 8 hours being in one major and 4 hours in the second major). If a student has already completed 3 co-op experiences in a single major, a fourth cooperative education experience will be required.
